

The image block contains three photographs illustrating the 'Blind' system. The leftmost image shows a modern building facade with several rectangular windows, each fitted with a dark, horizontal-slatted blind. The middle image is a detailed cross-section of the window assembly, showing the blind's mounting brackets, the window frame, and the surrounding wall structure. The rightmost image is a close-up of the blind mechanism, highlighting the horizontal slats and the internal control system, set against a textured blue background.

- Raffstore KRPAN mit Unterputzkasten, allseitig geschlossen, Isolierträger aus dickwandigem extrudiertem Aluminium, was die Kompaktheit und Haltbarkeit des Unterputzkastens gewährleistet. Die Führungsschienen sind ästhetisch mit PVC-Enden und festen Bürsten für einen leiseren Betrieb ausgeführt. Bei Rollläden-Insektenschutz ist die Bremse zum leichteren Anheben enthalten.
