KRATER

The KRATER external venetian blind system combines universal installation options, immediate usability, independence from the facade design, a robust construction, and numerous other advantages. It features a compact, modern appearance and is suitable for both concealed (under-plaster) and visible installation. The KRATER system is extremely easy to install in just a few steps. The complete system – both the venetian blind and the insect screen – is already integrated into the box, which is simply placed onto the guide rails and fastened to the window.

Premium appearance

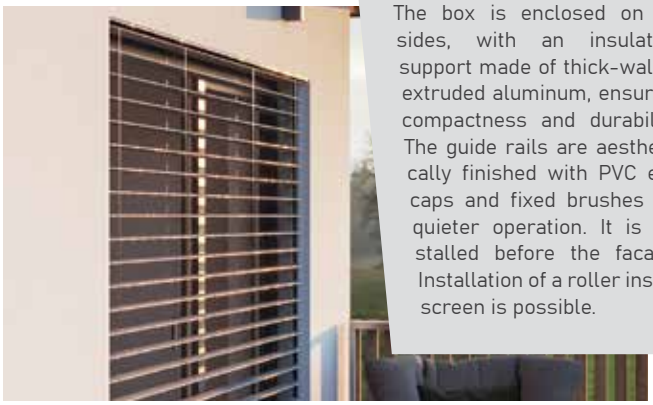

Easy mount

Regulation light

VISIBLE MASK

The KRATER external venetian blind features a visible aluminum box that ensures compactness and long-term durability. The guide rails are aesthetically finished with PVC end caps and fixed brushes for quieter operation. The system is easy to install, as it is mounted after the facade is completed. The integrated roller insect screens include a brake for smoother lifting.

UNDER PLASTER

The box is enclosed on all sides, with an insulation support made of thick-walled extruded aluminum, ensuring compactness and durability. The guide rails are aesthetically finished with PVC end caps and fixed brushes for quieter operation. It is installed before the facade. Installation of a roller insect screen is possible.

WHY KRATER

- cost savings on measurements
- numerous color and design combinations
- under-plaster – fully concealed or visible installation
- easy plastering of window reveals
- option to install an integrated roller insect screen
- various drive options – including remote control
- affordable price

KRPAN

Krpan external venetian blinds are blinds with a standard system design. The complete set includes standard slats, a mechanism, classic brackets and guide rails, and a visible cover. They are suitable for both new constructions and renovations of older buildings. Installation of these blinds does not need to be planned in advance, as they are installed after the facade is completed. Together with the facade and window joinery, Krpan blinds enhance the exterior appearance of the building with various color combinations.

SPACERS

1. Standard PC 43mm
2. ALU Z-profile 43mm
3. Telescopic ALU
4. Compact ALU

VISIBLE MASK

It combines outstanding functionality with affordability. Its easy installation after the facade is completed offers a quick and efficient solution without the need for prior planning, making it an excellent choice for both new constructions and renovations of older buildings. Available in a wide range of color combinations, it enhances the aesthetic appearance of the house.

UNDER PLASTER

The box is enclosed on all sides, with an insulation support made of thick-walled extruded aluminum, ensuring compactness and durability. The concealed guide rail (EPS, Purenit) allows for hidden installation.

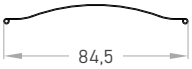

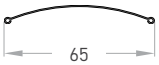

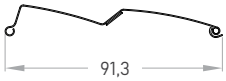

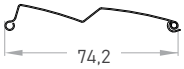

TERMOBOX-V

The insulated top-mounted box is ideal for installation in new buildings (passive houses) where maximum insulation is required. It is also suitable for use in existing buildings during window replacement. The box is concealed under the plaster and does not affect the exterior appearance of the building.

- box size: 300 x 300 m
- excellent insulation
- sound insulation
- airtightness
- concealed installation
- choice of shading type during window installation
